Letter from n° 228

Are you worried about the environment?

Hi! Protecting the planet is very important to me. I am afraid for the future of our Earth*. What about you? Do you agree with me? Are you doing something for the environment?

Hard to fight* it!

Yes, I agree with you! Protecting our environment is very important. Personally, I collect and recycle our rubbish*. It's dangerous to live with pollution, but nobody feels concerned so it's not easy to fight* it!!!! Djanati, age 15

Scary future

I am worried about the environment. I always tell my friends to pick* up what they have just thrown* on the ground* and when they don't do it, I do it for them. I'm also scared* for the future. It is important for me to not pollute our Earth*. Juliette, age 12

Plant a tree!

Yes, I am worried about the environment because we pollute a lot. Furthermore*, we cut trees in the Amazon and that's not good for the environment. It would be good for each person to simply plant one tree and reduce* the pollution.

Laura, age 13.

Pick* up papers!

Yes, I'm worried about the environment. Every morning, before I go to school I switch* off the light in my bedroom. In the street, I pick* up papers that are flying* about and I put them in the bin*. Although many people are not worried about the environment, anyone who is worried about it can do something around their house, even during the holidays.

People should be more aware*

Protecting the environment is very important of course! But alone, we can't do anything. We can't change the mentality of some people. Many people want to change the world: maybe it's enough for their local environment, but for the whole Earth*, it's not! People are not aware* enough!

Marie, age 13

Recycle!

Hi. Yes, I'm worried about the environment because it's everyone's Earth* and we are all in danger if we pollute it. That's why I recycle fruit and vegetable peel* in a composter specially made for peels. I also garden* without using any chemicals.

Elea, age 12
